Kale Shared Higher Expressed Genes

Kale Shared Higher Expressed Genes					
small molecule metabolic process	organic acid metabolic process	response to herbivore	response to biotic stimulus	interspecies interaction between organisms	photosynthesis
		response to	<b>cherbivore</b> ponse to iron ion starvation		
fatty acid derivative metabolic process  lipid biosynthetic process	vative metabolismabolic process	positive regulation of plant–type hypersensitive response	detection of fungus	benzoate metabolism	response to stimulus
	fatty acid derivative biosynthetic process				
	isoprenoid biosynthetic process	nitrile biosynthetic proc <mark>nitrile me</mark>	rabolismirile metabolic process	protein phosphorylation derivative c	regulation of stomatal movement
